RE: Digital Future Voice & Data:

After extensive research, Corporate Specialty Services Inc. chose Digital Future Voice & Data to purchase its new Cisco phone system. They were chosen not just because they provided a good quality product at a competitive price; but because of their professionalism, technical expertise, and experience. They gave us confidence that they would be able to design a phone system that would satisfy our unique needs and that they would provide excellent service implementing the system. We are very pleased to say that they did not disappoint. While there were a few challenges in the implementation, Digital Future responded quickly and effectively to each of them. They also worked very well with our other service providers to make the transition as seamless as possible.

It was a pleasure working with Rick, Micky, Nadji, and Paul. While technically proficient, they were still able to talk to us at our level of expertise. They offered meaningful solutions and suggestions. We highly recommend Digital Future Voice & Data to anyone looking to purchase a new phone system, in the firm belief that they will be most satisfied.

Sincerely,

Peter Rex
