

November 10, 2010

We used Digital Future to replace our phone system and then later to expand our system when we moved to larger offices.

They also helped us by installing and setting up a new POE network.

In all cases, the work was performed with excellent quality.

Where there were a few minor issues, these were followed up and resolved quickly and professionally.

I would highly recommend Digital Future for any phone system or networking needs you might have.
