To Whom it May Concern:

Digital Future Voice & Data

We have used the services of Digital Future Voice & Data (Digital Future) for over one year.

We were aware that we would be expanding our offices, would need a larger phone system and that we would want Internet based phones for users outside of the office. That caused us to contact a number of companies. Rick Vukadanovich of Digital Future met with me to discuss our existing equipment, then current and anticipated needs.

I chose to use Digital Future because Rick's proposal made the most sense to me. He suggested keeping much of our existing equipment, and, he showed how it could be utilized in a new system as well. He had good implementation suggestions.

Our firm grew faster and more than anticipated. One thing that has remained reliable is our phone system, which has grown with us. We have moved from analogue to most advanced digital Prime Rate Interface services with additional implementation of VoIP telephony. Our staff have barely noticed the changes.

I do recommend Digital Future for equipment purchases, leasing, and for ongoing maintenance.

Sincerely,

Donald Clarke
Office Manager
